PROCESSNILE

- Processnile – eMoney the safest and most reliable payment processing and payment aggregation platform is at the forefront of this technological revolution in Africa.
- Processnile – eMoney’s mission is to simplify payments for endless possibilities because the possibilities of excellent, simple and safe payment solutions are truly endless (no pun intended). It doesn’t just grow commerce across the continent, it also grows its prosperity and with prosperity comes so much more.
- In this article, we will be sharing some of the different ways Processnile – eMoney helps businesses receive payments from customers across the world. Before you can receive payments through Processnile – E-money, you need to have an account. You can create one with just one click and in a few seconds.

Ecommerce Platform – where customers can list their stores and allow inter-country commerce to bring revenue and traffic

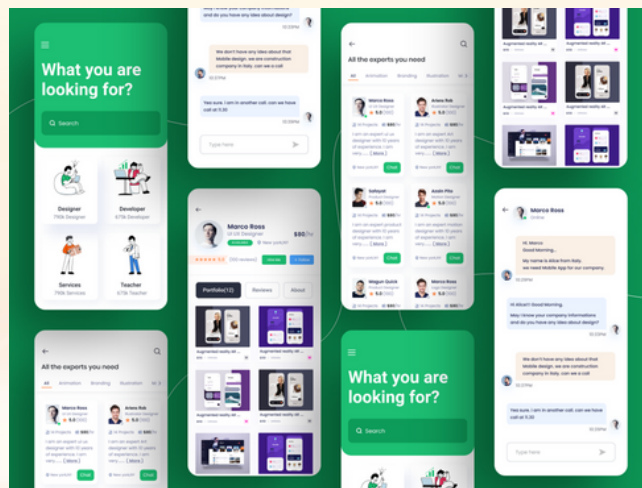

Wallet creation payments platform –

that allows the subscribers to create their wallets and attach the same with any utilities or bill payments that enable another direction of traffic

A freelancer Project Management Platform –

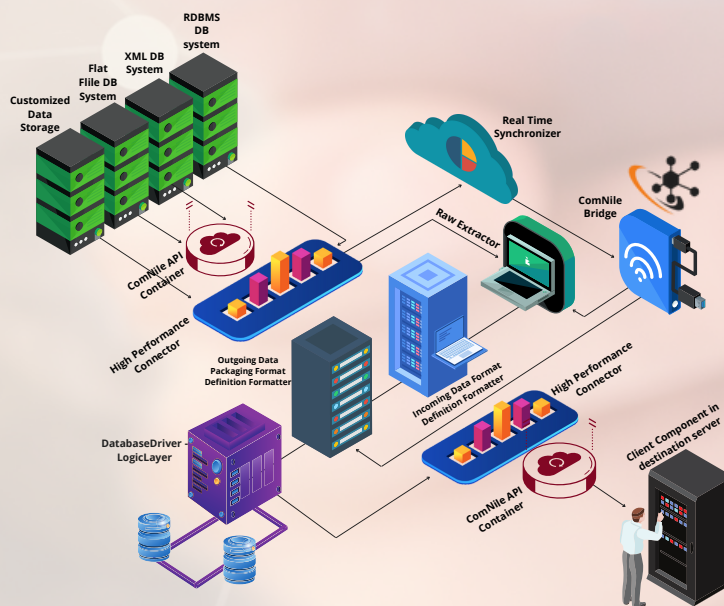

where cross border experts on various project requirements shall be recruited and paid through our platform

Thus ProcessNile – money is not just a money transfer and transaction processing platform, instead, it has various ways in which the investors shall increase the traffics on the platform.

Various ERP Integrations

Also, the platform is so flexible that I can accommodate the ERP of various industries directly expanding the income stream by increasing traffic on the platform by integrating to ERP systems, where the enterprises and SMEs shall pay all their overseas bills directly to their vendors through our platform
